Bridging the gap between okay clean, to detailed disinfecting cleaning killing viruses, E-Coli; leaving facilities shiny with no harm to surfaces & restored.

Voyage to a New Beginning

- ❖ Quick cleans just don't cut it
- ❖ We tried everything to 'mask' stale smells; nothing worked previously
- ❖ We thought paying our own staff would suffice in our cleaning needs to only discover the opposite. Unhappy owners, clients & personnel.
- ❖ Just don't know where or how to begin.

Lessons Learned

- We learned that our staff hadn't the time to correctly mop the floors, they were periodically swept and spot mopped instead of daily.
- Past service providers haven't had accountability nor stayed actual stated times.
- We were using too high of a soap content product on our floors creating a larger effort and expense.

Progress.....

- After our meeting; we became aware of correct equipment, processes, regular strategies for our staff to perform expected duties including correct products. We value our weekly meetings with the Above & Beyond as they continue to make our business better each day.

The cleaning team is professional, positive and our clients loved their clean. This is the first time we have experienced compliments about cleaning service. Typically clients are surprised they're properties were cleaned in the past. We will definitely be scheduling future service with your company.
